

MERAS RHI

in the Hospitality Industry

Best Practices

- Dates** October 17th – 18th 2017
- Venue** Ajman Beach Hotel
- Theme** Best recycling practices to attain better sustainability in the hospitality industry

What is this symposium all about

The hospitality industry generates massive amounts of waste; this symposium will address best practices in waste management through proper recycling.

Topics of interest will focus on

- ✚ Glass, metal food and beverage containers
- ✚ Old newspaper
- ✚ White office paper and printouts
- ✚ Corrugated cardboards
- ✚ Scrap metal
- ✚ Waste oil
- ✚ Lead acid storage batteries
- ✚ Leaves, grass and garden waste
- ✚ Food waste management
- ✚ Special focus on recycling of other items such as plastic containers and how to identify type and separate the colors

Why Recycle?

Closer look at recycling benefits through:

- ✚ Avoidance of disposal costs.
- ✚ Reducing the amount of waste that must be disposed – reduce incineration costs and less landfills
- ✚ Preventing or reducing air and ground water pollution.
- ✚ Conservation of precious natural resources – since fewer raw materials need to be extracted and processed.
- ✚ Saving energy and making us more sustainable because we are borrowing less materials and energy from our children's future.
- ✚ We will be protecting our health as well as the environment if we recycle

Adopt waste prevention policies

- ✚ Why buy recycled materials.
- ✚ How to incorporate source reduction objectives into procurement policy guidelines to decrease the amount of waste generated.
- ✚ How to encourage manufacturers to develop and sell products that create less waste, and often save money.
- ✚ Benefits of purchasing reusable items instead of single-use items, such as flatware, mugs, dishes, trays, coffee filters, salt and pepper shakers and bulk containers for sugar, mustard, and ketchup and avoid individually wrapped servings.
- ✚ Buying in bulk, such as cleaning products, food products, and office supplies.
- ✚ The use of soda fountain dispensers, milk in steel containers, and water coolers to decrease use of disposable beverage containers, and purchase other beverages.
- ✚ Identifying local options for composting organics and rendering fats and grease are available.

Who Will Attend?

- | | |
|------------------------|---------------------------------|
| ✓ Hotels, | ✓ Technologies providers |
| ✓ Restaurants, | ✓ Consultants, |
| ✓ Cafeterias, | ✓ Recyclers, |
| ✓ Clubs, | ✓ Material suppliers |
| ✓ Cruise ships, | ✓ Educators, |
| ✓ Resorts, | ✓ Solution providers |
| ✓ Hospitals, | |

Why should we do it?

Environmental Reasons:

It is said that waste is a mine above the ground; we must stop using landfills “eventually” to reduce wasting land and polluting the air we breathe and underground water. We must save our earth resources for future generations.

Economic Reasons:

Avoid wasting valuable raw material, dependence on newly manufactured products means energy wastage, immense increase in carbon emissions and depletion of natural resources, recycling is a profitable business, it is said we are making cash from trash. It is a job generator and wealth mover in addition to the environmental impacts mention above.

The Audience:

Anyone cares for the environment and waste reduction in the hospitality sector.

View from earlier MERAS

Participation:

As a delegate, you will get hands on knowledge directly from the experts, network and discuss various recycling issues.

As a speaker, you will benefit attendees from hospitality sectors by sharing your ideas or present the technology to a new and fresh market.

The Venue

Ajman Beach Hotel – Fine Comfort
